PROFESSIONAL EXPERIENCE

Accounting Systems & Data Management Volunteer

White Spoon Enterprise | May 2026

- Designed and implemented a digital accounting system to replace manual financial tracking, improving record retrieval efficiency
- Led the transition from manual to structured electronic financial records while ensuring zero data loss during migration
- Developed data organization solutions that improved operational efficiency and enhanced financial reporting accuracy

National Service Personnel – Estate Accounts Unit

Registrar General's Department, Accra | September 2024 – August 2025

- Processed and verified financial documentation for estate accounts in compliance with governmental accounting standards
- Spearheaded the introduction of a cloud-based data management system within the unit, improving data organization and secure access to records
- Managed the preparation, organization, and maintenance of high-volume financial records, ensuring accuracy in filing and auditing processes
- Prepared cash books, performed bank reconciliations, handled banking duties, and assisted with tax return processes

Volunteer Staff – Estate Accounts Unit

Registrar General's Department, Accra | September 2025 – Present

- Assisting with estate accounts processing and financial documentation
- Supporting records management, filing, and verification of financial data
- Assisting with cash books, bank reconciliation, banking duties, and tax return processes
- Supporting cloud-based data organization and administrative operations

Credit Officer Intern

GCB Bank PLC | November 2022 – December 2022

- Assisted in processing credit documentation and loan applications, supporting evaluation of customer financial profiles
- Executed accurate financial data entry and maintained updated credit records within the bank's internal systems
- Supported compliance and documentation procedures, assisting in risk assessment and customer account verification

Financial Secretary

LifeCity Church & Apostles of Event | 2017 – 2023

- Managed financial records including income, expenditures, and contributions while ensuring transparency and accountability
- Prepared financial summaries, budgets, and variance reports for leadership review and decision-making
- Streamlined event budgeting and expenditure tracking, reducing financial discrepancies during organizational events

PROJECTS

Accounting Record Management System | HTML, CSS, JavaScript

- Designed and developed a web-based application for small enterprises to manage and track financial records
- Implemented features for organized record storage, real-time financial tracking, and automated data management

GitHub Portfolio: github.com/Francis2150

Financial Modelling & Valuation Projects | Microsoft Excel

- Built dynamic three-statement financial models and discounted cash flow (DCF) valuation models for corporate analysis
- Applied scenario and sensitivity analysis techniques to support budgeting and financial decision-making

PROFESSIONAL ATTRIBUTES

- Attention to Detail
- Integrity and Accountability
- Strong Organizational Skills
- Team Collaboration
- Adaptability and Fast Learning
